Nature Nurture Poster Project

Create a caricature picture of yourself that represents who you are as a person. For example, your head in the picture could be open exposing your brain to show that you are an open minded person or maybe you might want to have a lock on your head if you are a closed minded person.

Try to represent as many traits, behaviors, beliefs, likes and dislikes as you can think of to represent yourself in your poster.

As the final part of the poster explain whether you believe it was nature (biology) or nurture (the environment in which you were raised) or a combination of both nature & nurture that influenced each traits, behaviors, beliefs, likes and dislikes displayed in your poster. Please use leader lines to connect your explanation(s) to each feature on your drawing.
